

# YOU'VE GOT THE POWER

With FastTrack HVAC Pay As You Save®

**Ameren Missouri is offering a valuable program to help you promote the sale and installation of high-quality, energy-efficient air conditioning and air-source heat pump equipment.**

The Ameren Missouri FastTrack HVAC PAYS® program is an on-bill financing program that offers financial incentives through equipment rebates. It can help boost your sales by offering your customers financial incentives when they purchase qualified equipment through you.

## How Does It Work?

When you become a participating contractor, you'll join Ameren Missouri in promoting the use of energy-efficient products and services. In return, Ameren Missouri will help you build your business by marketing the program and channeling customers directly to you.

The program offers rebates\* and on-bill financing to customers who buy qualified energy-efficient air conditioning and heating equipment from you.

\*Some restrictions may apply. Visit [AmerenMissouri.com/FastTrackContractor](https://AmerenMissouri.com/FastTrackContractor) for full program details.

## What Are Some of the Benefits of Becoming a Participating Contractor?

In addition to the rebates\* you can offer through the Ameren Missouri FastTrack HVAC PAYS Program, participating in the program offers multiple benefits:

- You'll have access to a new range of potential customers interested in energy efficiency.
- We'll provide you with marketing materials to help in your sales and marketing efforts.
- You'll have access to an assigned account manager to assist you with program questions and issues.

## How Do I Sign Up?

Becoming a participating contractor requires just these simple steps:

1. Attend Ameren Missouri participating contractor training
2. Complete the Participating Contractor Agreement
3. Provide current licenses as applicable
4. Agree to the program terms and conditions
5. Complete FastTrack App training

## How Does the Rebate Process Work?

Contractors will use a web app to collect data about the existing HVAC equipment and the residence. The app will provide an offer, which shows the customer and contractor how much this particular customer may save by replacing their HVAC system, based on their historical electric usage and the equipment and building data provided by the contractor. The offer will include the applicable Ameren Missouri rebates. The utility will cover part of the cost of the project, and the customer will pay back the utility on their monthly utility bills through on-bill financing.

If the customer accepts the offer, the contractor will install the equipment and complete the application in the web app. The utility will pay the contractor for the amount covered by the tariff, and the customer will pay the contractor any portion of the project not covered, and will repay the utility through on-bill financing.

**Participating contractor** status does not imply an Ameren Missouri endorsement of the contractor in any way; rather, it simply identifies contractors who have completed the required program training and committed to actively promoting the program and completing the incentive form for customers.
